Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Comments	10/572,777	CULL ET AL.				
Office Action Summary	Examiner	Art Unit				
	MICHAEL ROZANSKI	3768				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence ad	dress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

## Election/Restrictions

Applicant's argument with regard to the Examiner's holding of constructive election being improper for claims 26-28 is persuasive and the restriction is hereby withdrawn.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-17 and 26-28 rejected under 35 U.S.C. 103(a) as being unpatentable over Zhu (US 6,694,165) in view of Harvey et al (US PUB 2001/003162).

Zhu discloses a method of data acquisition and reconstruction for use with a MRI system that includes partially traversing k-space in a plurality of segments, computing sub-images for each of the segments, and incrementally reconstructing a plurality of intermediate and final images on-the-fly. The partial k-space traversing reduces data acquisition time and the incremental reconstruction reduces acquisition-to-visualization latency (see Abstract). On-the-fly reconstruction refers to the practice of initiating and completing much (not necessarily all) of the reconstruction computations involved in producing an image simultaneously with acquiring the k-space data that contribute to the image (col 4, lines 26-30). The method also comprises traversing partial k-space in

a plurality of fractional view groups, filling in skipped views in accordance with Hermitian symmetry and computing a pair of sub-images for each view group pairs immediately after the pair's acquisition, and incrementally reconstructing final images on-the-fly in a way that is equivalent to computing full-sized FFT's on full k-space data sets (col 7, lines 5-24).

Zhu describes using Hermitian symmetry for filling in skipped views, but does not specifically describe dividing k-space into annular regions. In the same field of endeavor, Harvey et al teach of dividing k-space into a central region 40 and an outer region 50. The central region is scanned along lines segments 41, 42, 43, 44, 45 and the outer region is scanned with a so-called high-low strategy ([0046]; see figure 2). It would have been obvious to the skilled artisan to modify Zhu, as taught by Harvey et al, in order to acquire a better image by first acquiring samples during an optimal time [0007].

# Response to Arguments

Applicant's arguments with respect to claims 1-17 and 26-28 have been considered but are moot in view of the new ground(s) of rejection. This action is made Non-Final.

#### Conclusion

Art Unit: 3768

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL ROZANSKI whose telephone number is (571)272-1648. The examiner can normally be reached on Monday - Friday, 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
